Local Permit Rules & Diagnostic Overview (Roseville, CA)

Roseville, Rocklin, and Folsom sit on expansive Redesdale and Alamo clay soils that swell during winter rains and shrink violently during 100°F summers. This seasonal movement snaps perimeter stem walls and causes slab corners to sink. We weld structural cracks with carbon-fiber epoxy staples and drive galvanized steel piers to load-bearing bedrock.

Technical Specifications & Material Standards

Expansive Clay Foundation Cracks (\$1,400 - \$2,900 (Crack Stitching) | \$6,800 - \$14,500 (Steel Pier Underpinning)): Roseville, Rocklin, and Folsom sit on expansive Redesdale and Alamo clay soils that swell during winter rains and shrink violently during 100°F summers. This seasonal movement snaps perimeter stem walls and causes slab corners to sink. We weld structural cracks with carbon-fiber epoxy staples and drive galvanized steel piers to load-bearing bedrock.

Crawl Space Encapsulation Cost (\$3,200 - \$6,400 (20-Mil Liner) | \$6,500 - \$11,500 (Full Encapsulation + Dehumidifier + Sump)): Raised-foundation homes in Old Roseville (95678), Granite Bay, Folsom, and East Sacramento trap winter water over shallow hardpan. Up to 50% of the air you breathe upstairs rises from the dirt crawl space. We pump out standing water, replace rotted Douglas Fir girders, and seal the sub-area with a 20-mil antimicrobial vapor barrier.

Retaining Wall Permit & Cost (\$65 - \$140 Per Sq. Face Foot (\$4,800 - \$18,500 Installed)): In the City of Roseville, Rocklin, and Folsom, any retaining wall over 4 feet tall (measured from the bottom of the footing to the top of the wall) or any wall holding back a sloped driveway/surcharge requires a building permit and structural engineering. We replace leaning timber and unreinforced block walls with code-compliant Keystone, Allan Block, and poured rebar concrete walls.

30-Mile Soil & Infrastructure Profile

Roseville, CA (95661, 95678, 95747): Expansive Redesdale clay & Mehrten volcanic hardpan (2.5-4.5 ft depth) (I-80, Hwy 65, Douglas Blvd & Galleria Blvd).

Rocklin, CA (95677, 95765): Decomposed granite & high-runoff clay loam slopes (I-80, Stanford Ranch Rd, Sunset Blvd & Granite Dr).

Folsom, CA (95630): Cobble dredge tailings, clay hardpan & hillside bedrock (Hwy 50, East Bidwell St, Iron Point Rd & Broadstone).

Granite Bay, CA (95746): High-water-table decomposed granite & perched seasonal groundwater (Douglas Blvd, Auburn Folsom Rd & Barton Rd).

El Dorado Hills, CA (95762): Steep hillside metamorphic rock & expansive clay pockets (Hwy 50, El Dorado Hills Blvd, Latrobe Rd & Serrano).
