Local Permit Rules & Diagnostic Overview (Roseville, CA)

Homes in Central Roseville (95678), Citrus Heights, and older Rocklin neighborhoods built between 1955 and 1982 often have tar-paper Orangeburg pipes or vitrified clay joints invaded by Valley Oak roots. Trenchless pipe bursting and structural epoxy lining replace the damaged lateral without jackhammering your driveway or patio.

Technical Specifications & Material Standards

Tree Roots & Orangeburg Pipe (\$2,400 (Spot Liner) to \$8,900 (Full Seamless CIPP / Pipe Bursting)): Homes in Central Roseville (95678), Citrus Heights, and older Rocklin neighborhoods built between 1955 and 1982 often have tar-paper Orangeburg pipes or vitrified clay joints invaded by Valley Oak roots. Trenchless pipe bursting and structural epoxy lining replace the damaged lateral without jackhammering your driveway or patio.

Hydro Jetting Cost vs Snaking (\$395 - \$695 Residential | \$550 - \$950 Commercial (Includes HD Camera Proof)): A cheap \$99 rooter cable only pokes a 1.5-inch breathing hole through grease and fibrous roots, guaranteeing another backup within weeks. Our truck-mounted 4,000 PSI @ 18 GPM hydro jetting system scours 100% of the pipe wall clean and includes a before-and-after 1080p sonde camera recording.

French Drain Cost Per Foot (\$45 - \$85 Per Linear Foot (\$2,800 - \$6,900 Typical Yard System)): Roseville (95661, 95747) and Rocklin sit on shallow volcanic Mehrten hardpan and heavy Redesdale clay. Winter rain cannot soak downward, so water pools against foundation stem walls and floods crawl spaces. We install rigid 4-inch SDR-35 PVC French drains wrapped in 8oz geotextile fabric and washed crushed rock.

30-Mile Soil & Infrastructure Profile

Roseville, CA (95661, 95678, 95747): Expansive Redesdale clay & Mehrten volcanic hardpan (2.5-4.5 ft depth) (I-80, Hwy 65, Douglas Blvd & Galleria Blvd).

Rocklin, CA (95677, 95765): Decomposed granite & high-runoff clay loam slopes (I-80, Stanford Ranch Rd, Sunset Blvd & Granite Dr).

Folsom, CA (95630): Cobble dredge tailings, clay hardpan & hillside bedrock (Hwy 50, East Bidwell St, Iron Point Rd & Broadstone).

Granite Bay, CA (95746): High-water-table decomposed granite & perched seasonal groundwater (Douglas Blvd, Auburn Folsom Rd & Barton Rd).

El Dorado Hills, CA (95762): Steep hillside metamorphic rock & expansive clay pockets (Hwy 50, El Dorado Hills Blvd, Latrobe Rd & Serrano).
