Local Permit Rules & Diagnostic Overview (Roseville, CA)

Under City of Roseville Municipal Code Chapter 19.66 (and Placer County / Folsom oak ordinances), native Valley Oaks, Interior Live Oaks, and Blue Oaks ≥ 6 inches DBH require a Tree Permit UNLESS the tree has fallen, split, or poses an imminent emergency hazard to life or structures. We document the emergency hazard with geotagged photos, coordinate arborist sign-off, and remove the dangerous oak safely.

Technical Specifications & Material Standards

Roseville Oak Tree Permit Guide (Same-Day Emergency Hazard Documentation + Crane Extraction (\$1,800 - \$5,800)): Under City of Roseville Municipal Code Chapter 19.66 (and Placer County / Folsom oak ordinances), native Valley Oaks, Interior Live Oaks, and Blue Oaks ≥ 6 inches DBH require a Tree Permit UNLESS the tree has fallen, split, or poses an imminent emergency hazard to life or structures. We document the emergency hazard with geotagged photos, coordinate arborist sign-off, and remove the dangerous oak safely.

Fallen Tree Insurance & Cost (\$1,500 - \$6,500 (Direct Xactimate Insurance Billing & Roof Tarping)): Under California property law and standard HO-3 homeowners insurance policies, if a storm blows a healthy neighbor's tree onto your house, garage, or fence, YOUR homeowners insurance pays for crane removal off the structure and roof repairs (unless the neighbor knew the tree was dead/hazardous and ignored written warnings). We dispatch 24/7 crane crews, tarp the roof, and bill insurance using Xactimate line items.

Stump Grinding & Defensible Space (\$225 - \$650 Per Stump | \$1,400 - \$4,800 (PRC 4291 Insurance Brush Clearing)): Old stumps attract subterranean termites and push surface roots under concrete driveways and sewer lines, while overgrown brush triggers homeowners insurance non-renewals in Granite Bay, Folsom, Rocklin, and El Dorado Hills.

We grind stumps 8 to 14 inches below grade through any 36-inch gate and execute full CAL FIRE PRC 4291 100-foot defensible space clearing.

30-Mile Soil & Infrastructure Profile

Roseville, CA (95661, 95678, 95747): Expansive Redesdale clay & Mehrten volcanic hardpan (2.5-4.5 ft depth) (I-80, Hwy 65, Douglas Blvd & Galleria Blvd).

Rocklin, CA (95677, 95765): Decomposed granite & high-runoff clay loam slopes (I-80, Stanford Ranch Rd, Sunset Blvd & Granite Dr).

Folsom, CA (95630): Cobble dredge tailings, clay hardpan & hillside bedrock (Hwy 50, East Bidwell St, Iron Point Rd & Broadstone).

Granite Bay, CA (95746): High-water-table decomposed granite & perched seasonal groundwater (Douglas Blvd, Auburn Folsom Rd & Barton Rd).

El Dorado Hills, CA (95762): Steep hillside metamorphic rock & expansive clay pockets (Hwy 50, El Dorado Hills Blvd, Latrobe Rd & Serrano).
