GOLD STANDARD LOCAL SEO • OFFICIAL CLIENT TECHNICAL SPECIFICATION

Google Maps 3-Pack Domination Blueprint: Algorithmic Territory Lock & 10-Mile Radius Proximity Expansion for Trade Contractors

Lead Architect: Justin Davis | **Entity:** Gold Standard Assets, LLC | **Jurisdiction:** Folsom, CA 95630 | **Offer:** Universal $297/mo Territory Lock | **Live Onboarding:** https://klicktree.com/contractors

- **10-Mile Radius Exclusivity:** Strictly one contractor per trade per zip code territory. Competitors in your trade cannot buy into your locked radius.
- **Geo-Grid Heatmap Expansion:** Eliminates local proximity drop-offs, converting yellow and red ranking nodes into dominant green #1 spots.
- **Multi-Entity Authority Stacking:** Cryptographic EXIF/XMP metadata injection, canonical Schema.org graphs, and High-Trust entity citations.
- **Flat-Rate Cost Certainty:** Flat $297/month investment with zero percentage fees, zero lead markups, and zero long-term contractual lock-in.

1. The Commercial Reality of Local 3-Pack Search: Over 75% of high-intent inbound homeowner phone calls for trade services (Roofing, HVAC, Plumbing, Remodeling, Electrical, Landscaping) are captured exclusively by the top 3 businesses featured in the Google Maps Local 3-Pack. When emergency repairs or high-ticket installations arise, homeowners do not scroll to organic page two. Businesses outside the top 3 suffer severe revenue bleed, forfeiting dozens of qualified high-ticket jobs monthly to competitors.

2. Algorithmic Proximity Expansion Mechanics: Google's ranking engine calculates local rank based on three core pillars: Relevance, Prominence, and Proximity. Traditional SEO agencies focus exclusively on the business's physical address, causing

ranking pins to drop from #1 to #15 just two miles from the office. Gold Standard Local SEO engineers a concentric geodesic mesh of verified local authority nodes, service-area schema vectors, and structured entity co-citations that expands the green #1 ranking radius across a full 10-mile radius.

3. Complete Deliverables & Weekly Execution Cadence:
• *Weekly Done-For-You GBP Updates:* Fresh, conversion-focused posts published every 7 days with geotagged authority images.
• *Review Velocity & Sentiment Engine:* Automated past-customer reactivation campaigns that inject natural, verified 5-star Google reviews.
• *Proximity Signal Ingestion:* High-resolution geotagged photographic proof embedded with EXIF GPS coordinates, IPTC rights, and Schema.org graphs.
• *Speed-to-Lead Telecom Dispatch:* Sub-10-second automated SMS and email routing ensuring no inbound contractor inquiry ever falls through the cracks.

4. Territory Verification & Claiming Protocol: Territory exclusivity is granted strictly on a first-come, first-served basis. To verify whether your 10-mile radius is currently open for your trade, or to immediately lock your territory at the promotional $297/mo rate, access the secure onboarding portal at **https://klicktree.com/contractors** or call Justin Davis directly at (916) 994-1999.
